

STRENGTHENING IIoT SECURITY

DigiCert® Device Trust Manager Integrated with Litmus Edge Manager

Overview

At DigiCert, we are committed to providing industry-leading digital trust solutions that help organizations secure their connected devices, data, and infrastructure. Today, we're excited to announce a new integration between DigiCert Device Trust Manager and Litmus, a leading edge platform provider. This collaboration marks a significant step forward in our mission to simplify and enhance Industrial IoT (IIoT) security for organizations across industries.

Seamless Integration for Enhanced Security

With the rapid expansion of IIoT ecosystems, managing and securing devices at the edge has never been more critical. Our integration with Litmus Edge Manager enables organizations to automate certificate issuance and management directly within the Litmus platform. This seamless integration allows users to easily secure their IIoT devices without the need for complex setups or deep security expertise.

A New Standard for IIoT Security

The partnership with Litmus reflects DigiCert's ongoing commitment to deliver innovative and effective solutions for IIoT security. By integrating Device Trust Manager with Litmus Edge Manager, DigiCert is setting a new standard for secure IIoT deployments. We are thrilled to offer our customers a comprehensive solution that combines DigiCert's expertise in digital trust with Litmus' powerful edge management capabilities.

Key Benefits of the Integration

Automated Security: The integration streamlines the process of certificate issuance and renewal, ensuring that every IIoT device at the edge is authenticated and secure. This automation reduces manual intervention and helps prevent unauthorized access.

Simplified Management: Users can connect and link to their DigiCert-hosted PKI from within the Litmus UI, allowing organizations to manage certificates across their IIoT assets.

Enhanced Operational Efficiency: By bringing DigiCert's trusted security capabilities to the Litmus platform, organizations can enhance their operational efficiency while maintaining robust security standards.
